KIMI ESCAPE MASK LHR UK 610 K

Kimi - Chemical Escape Device

In each of these situations the best chance of survival is to **get out quickly**. Getting out may take time and you may be impeded by others also trying to escape.

Kimi is a personal emergency device for short-term respiratory protection during escape from an area of a chemical spill.

It offers protection against organic gases and vapours with a boiling point higher than 65°C, plus certain norganic gases and vapours, Sulphur Dioxide and other acidic gases and vapours, Ammonia and Ammonia derivatives.

Kimi is CE marked as a chemical escape device

KIMI mask dons in seconds

Key features and benefits

- CE rated as chemical escape device - ensures protection
- Large flame retardant visor - allows a wide field of view to aid visibility when escaping
- Pocket sized
- Dons within seconds with no adjustment straps - provides protection almost instantly
- One size fits all - no need to stock or carry different sizes
- Strong, fire-resistant, elastic rubber hood - protects the entire head and seals comfortably at the neck.
- A specialist breathing device (patent pending), enables rapid exhalation and prevents build-up of heat or vapour inside the mask - improves the physiological conditions for the user
- High-efficiency, electrostatic particle filter, with extremely low pressure-drop to allow easy breathing
- Layers of activated charcoal with special impregnation to absorb toxic gases.
